### 17 - THE COURSE: Please comment on course content, requirement or any other aspect of the course.

<b>Response Rate</b>	2/12 (16.67%)
----------------------	---------------

- The course content was interesting and engaging throughout the semester.
- I LOVED THIS COURSE! I think it may just be my favorite course I've taken in college! It was the perfect balance of being beginner-friendly for coding but also fast-paced enough that I didn't ever feel bored or underwhelmed. The presentation of the material was engaging and by the end of 8 chapters I felt like I had learned so much and could apply it to my own files! I will say that some of the assignments were very hard (like 7 and 11), while others were surprisingly easy (like 8 and 12 I think), so I guess difficulty could have been a little more evenly spread but they were still really great assignments that were fun and satisfying to complete.

### 18 - THE INSTRUCTOR: Please comment on the strengths and weaknesses of Supraja Gurajala. Would you take another course from this instructor? -

<b>Response Rate</b>	3/12 (25%)
----------------------	------------

- I would definitely not take another course from this instructor if I had the choice. if there was another professor offering the course. I would take it with that professor. she rushes through the material and I do not get much from the lecture once she's done. when I go to her office hours I do not get enough help as I thought I would. I had no prior knowledge of java so this class was a bit tough for me. grasping the concepts was not that easy. I'd suggest she slows down a bit when going through the material in class.
- Supraja Gurajala's strengths lie in her ability to help her students with problems that they may have. Her weaknesses lie in how fast she goes through material. I would not hesitate to take another class from this instructor.
- She was amazing! Super structured and fast paced, and I learn best from teachers like that. She was also very nice, and I loved talking casually with her before class. She gave very good help to students who asked for clarification and encouraged us all to participate. She also went out of her way to change examples about questionable topics (i.e. a program about dropping "bombs" on "cities" which were just circles drawn around points on a plane, so they could have been given other meanings), and I respect that so much because she was very vocal about disapproving of what the example program was suggesting. I just loved her class so much and would absolutely love to take another course from her!
